

ST BOTOLPH'S

**BOSTON
STUMP**

1309 - 2009
700 YEARS

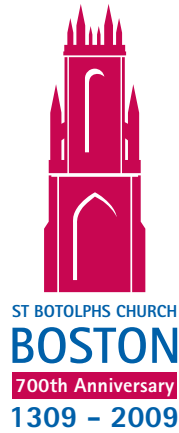

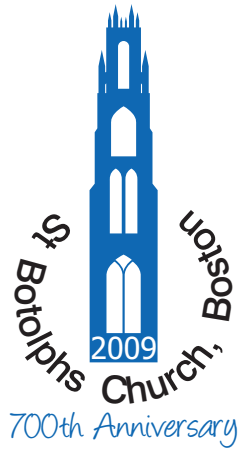

2009 marks a very special year for St Botolphs Church in Boston. It is the 700 anniversary since the first foundations of the church were laid.

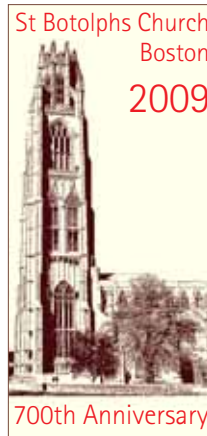

Many events are scheduled throughout the year and In Sync Design have been tasked with designing the exhibition and the promotional literature supporting all celebratory events.

The logo has been designed to feature prominently on all promotional material and has been reproduced in a variety of different ways such as badges and stickers. Look at the case study of this work to view the progress as each event is advertised.

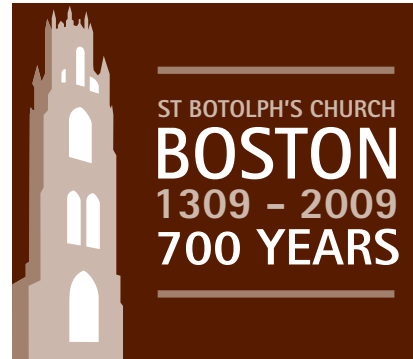

The Church itself is well worth a visit at any time as it features some stunning architecture and represents a host of interesting features for genealogists, historians, tourists and of course worshippers.
